[Interested in sponsoring a Broadband Forum meeting?](#)

The Broadband Forum holds three (3) meetings in Asia, Europe and North America each year.

The member meetings address these areas over a four-day week:

- The industry's key topics of the day with guest plenary/panel speakers
- The Town Hall Innovation Series host strategic themed discussions for each face-to-face meeting that:
  - Align with BBF strategic vision
  - Highlight industry trends
  - Directly impacts or influences future BBF work
- Innovation track "Birds of a Feather" or "Keynote" sessions with open discussions on topics such as 5G, USP, CloudCO, open sourcing, migration, etc.
- Detailed Technical Committee Work Area (WA) sessions in parallel tracks that bring together all of the conference calls and contributions submitted over the last quarter
- A meeting of the Service Provider Action council, and other ancillary groups such as Software Advisory Group, etc.
- Networking opportunities throughout the week

At each of these meetings, we warmly welcome invited guests to evaluate how Broadband Forum can provide a contribution to their business.

If you are interested being a guest at an upcoming meeting, please contact us by emailing [info@broadband-forum.org](mailto:info@broadband-forum.org).
